AMEND Senate Bill No. 2525

House Bill No. 2105*

by deleting the new subsection (b) from the amendatory language of Section 1 of the printed bill and substituting the following:

(b) In addition to the assistance with self-administration of medications provided for in subsection (a), qualified school personnel who volunteer and have been properly trained may administer glucagon in emergency situations to a student based on that student's individual health plan (IHP). However, if a health care professional is available and on site, the health care professional shall provide this service to the student. The registered nurse (R.N.) employed or contracted by the local education agency shall be responsible for updating and maintaining each IHP. The department of health and the department of education shall jointly amend current "Guidelines for Use of Health Care Professionals and Health Procedures in a School Setting" to reflect the appropriate procedures for use by registered nurses in training qualified school personnel in administering glucagon. The guidelines developed must be used uniformly by all local education agencies which choose to allow volunteer school personnel to administer glucagon.
